ARYAN

B.Tech CSE (AI & ML) | Maharaja Agrasen Institute of Technology (MAIT), GGSIPU
8851485307 | aryanmait29@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI & ML undergraduate with a 9.09 CGPA and hands-on experience in Machine Learning, Deep Learning and NLP. Experienced in developing end-to-end ML solutions involving data preprocessing, feature engineering, model training, evaluation and deployment. Skilled with Python-based ML libraries and frameworks, with a focus on applying AI/ML techniques to real-world problems and building practical solutions.

EDUCATION

Maharaja Agrasen Institute of Technology (MAIT), GGSIPU | Delhi, India
B.Tech – Computer Science & Engineering (Artificial Intelligence & Machine Learning) | **2025–2029** | **CGPA: 9.09 / 10**
Class XII: 87.2% **Class X:** 95.2%

RELEVANT SKILLS

- **Programming:** Python, JavaScript
- **ML/Data Science:** NumPy, Pandas, Scikit-learn, Matplotlib; Regression, Classification, Clustering, Ensemble Learning, Feature Engineering
- **Deep Learning & NLP:** TensorFlow, Keras, ANN, CNN, RNN, TF-IDF, Word2Vec, Tokenization
- **Tools:** Git, GitHub, Jupyter, VS Code, Streamlit

PROJECTS

Intelligent Freight Forecasting System | *SIH*
- Developed an ML-based freight forecasting system for optimized vessel chartering and bulk cargo procurement.
- Performed data preprocessing, feature engineering and exploratory analysis using freight volumes, economic indicators, port features and market indices.
- Implemented CatBoost regression for short- and medium-term freight rate forecasting; achieved approximately **85% prediction accuracy** during evaluation.
- Developed an interactive ML inference and deployment pipeline with frontend integration.

Student Exam Performance Prediction
- Developed an end-to-end supervised ML pipeline to predict student mathematics scores using preprocessing, EDA and feature engineering.
- Compared Linear Regression, Random Forest, Gradient Boosting, XGBoost, CatBoost and AdaBoost; achieved an **R^2 score of ~0.88**.
- Implemented modular data ingestion, transformation, model training and prediction components.

Customer Churn Prediction | *ANN*
- Developed a multi-layer Artificial Neural Network using TensorFlow/Keras for binary customer churn classification.
- Implemented categorical encoding, feature scaling, train-test splitting, model training and evaluation; achieved approximately **88% test accuracy**.
- Implemented model saving/loading and an inference pipeline for deployment.

CERTIFICATIONS & TRAINING

British Airways Data Science Virtual Experience | *Forage*
- Analyzed a 50,000-record dataset, performed EDA and developed a Random Forest classification model for holiday purchase prediction.

Complete Machine Learning & Data Science Course | *Krish Naik*
- 90% completed; covering Python, statistics, EDA, feature engineering, supervised and unsupervised ML, with ongoing Deep Learning and NLP study.

ACHIEVEMENTS

- 9.09 CGPA in First End-Semester examinations.
- Volunteered at a **college blood donation camp**, supporting event coordination and participant assistance.
- Built and deployed multiple **end-to-end ML applications** using Streamlit and Flask.
